SUMMARY

I am a self-motivated, detail-oriented individual who has experience working with graphic design and also understands back end program functionality. I will be able to provide a seamless transition between front end and back end in order to bridge the gap with what the client wants and what is functional. I pride myself on being a quick learner and my ability to work well under pressure in a deadline-driven environment. I have a thirst for knowledge and I am constantly searching for new ways that I can improve myself and apply my creativity. I aim to secure position with a company in which I can hone my skills and be a part of something bigger than myself.
